Profile

Data Analyst / Data Scientist with a Master’s degree in Statistics and Data Science (ENSSEA), specializing in data analysis, Machine Learning modeling, and Business Intelligence reporting. Hands-on experience in statistical analysis, data cleaning and validation, predictive model development, and decision-support dashboard design (Power BI). Skilled at turning complex data into actionable recommendations with measurable business impact.

Skills

Data Analysis & BI	Power BI (dashboards, DAX, data modeling), advanced Excel, decision-support reporting, descriptive and inferential statistics
Machine Learning & Data Science	Predictive modeling, Deep Learning, NLP, Computer Vision, model evaluation and optimization
Languages & Tools	Python, R, SQL, Jupyter Notebook
Project Portfolio	GitHub (hosting and showcasing Data Science and Machine Learning projects)
Soft Skills	Critical thinking, analytical rigor, problem-solving, curiosity, communication, attention to detail
Languages	Arabic (native), French (fluent), English (intermediate)

Professional Experience

Marketing & Data Analysis Associate	August 2024
Travel and Tourism Company	Constantine, Algeria
- Represented the company at events and communication booths, strengthening its visibility among the target audience. - Produced descriptive statistics on tourism trends to inform the company’s business decisions. - Conducted a comparative analysis of several commercial strategies to identify the best-performing one, contributing to an increase in the company’s sales. - Built a Machine Learning model predicting the likelihood of a customer accepting an offer, improving the targeting of marketing campaigns.	
Data Analyst Intern	July 2025
National Bank of Algeria (BNA)	Constantine, Algeria
- Explored the operations of several banking departments to map data flows and sources. - Identified and corrected data anomalies, improving the reliability of data used for internal reporting. - Designed interactive Power BI dashboards to monitor key banking indicators. - Wrote analytical reports for senior management, supporting data-driven decision-making based on visualization results.	

Projects

- Hotel Booking Cancellation Prediction** (Master’s thesis, ENSSEA): built a Machine Learning model helping hotels anticipate cancellations and optimize booking management.
- AI Booking**: developed a statistical results visualization application for hotel businesses.
- Health Care Dashboards**: performed extensive cleaning of the "HealthCare" dataset and built Power BI dashboards for medical data analysis.
- Gold Membership Acceptance Drivers** (convenience store chain): statistical analysis identifying the key drivers of customer subscription to guide the loyalty strategy.
- Kaggle Competition – Calories Burned Prediction**: Machine Learning model trained on data from 750,000 participants.
- Online Conversion Modeling**: built a predictive model to optimize digital marketing campaigns.

Education

Master’s Degree – Statistics and Data Science	2025 – 2026
National Higher School of Statistics and Applied Economics (ENSSEA)	Kolea, Algeria
- Specialization in data analysis, statistical modeling, Machine Learning, Deep Learning, and Data Science. - Master’s thesis (defended June 14, 2026): designed a Machine Learning model predicting hotel booking cancellations, helping properties anticipate revenue loss and optimize their booking management strategy.
